

May 2008

Dear Customer,

Thank you for your inquiry on our preparations for the REACH Regulation.

QolorTech is fully aware that the REACH legislation has entered into force on June 1<sup>st</sup>, 2007 and will set off with the Pre-registration on June 1<sup>st</sup> until December 1<sup>st</sup> in 2008.

Therefore QolorTech has identified all the substances that they import to the EU. QolorTech, as legal entity in the EU, will Pre-Register all these imported substances to the EU, which ultimately are supplied to you.

After January 2009, we will participate in SIEF's (Substance Information Exchange Fora), aiming at sharing intrinsic substance data and come to a joint registration for each of our substances in consortia, to reduce registration costs.

We do not have any substances meeting the requirements for a Registration deadline in 2010, so we will work on the following deadlines in 2013 and 2018.

In the joint registration with other consortium members, we will assure that all the uses of our clients will be addressed. If there are any uses, that we may not be aware of and that you would like us to consider please contact us after January 2009 and provide us the necessary information to include it in our Registration report.

For more information you can contact Mr. E.Cuijpers, who is responsible for the REACH preparation in our Company.

Sincerely,

QolorTech BV
